

3 WAYS the Surface Slim Pen 2 enhances productivity

Unlock the potential of putting
the pen to the screen

New ways of doing business require new tools—IT needs flexible, versatile devices and accessories to help employees keep up with evolving trends and work styles. Pairing the Surface with the Surface Slim Pen 2 delivers an elevated experience for employees, helping them produce their best work. Explore how this versatile toolset enhances productivity across industries and roles, from creatives sketching product designs to frontline workers taking notes.

1 Boosts adaptability for a diverse workforce

8 apps and counting

Support realistic inking with haptic signals

Employees can enjoy the Surface Slim Pen 2's sleek and comfortable carpenter-inspired style across their favorite Office applications, drawing and writing directly in Word, PowerPoint, and Excel. Select applications support the pen's haptic tactile signals, sending vibrations as employees make gestures like scribbling through words or circling text. Integrations with tactile signals are supported by some of the most used apps, including Microsoft Office, Microsoft PowerPoint, Microsoft Journal, Microsoft Whiteboard, Adobe® Fresco®, Sketchable, LiquidText™, and Shapr3D.

2 Unleash creativity with digital sketching

4,096 pressure levels

Provide a natural writing experience

The best-performing Surface Pen yet, the latest version is popular among digital artists and graphic designers. The re-designed Surface Slim Pen 2 offers pin-point accuracy and incredible shading thanks to a sharper pen tip, making it perfect for creating detailed illustrations and digital artwork.

3 Enable intuitive note-taking and collaboration

Up to 15 hours pen battery life*

Offer seamless, all-day productivity

Surface Slim Pen 2 provides a more natural and precise writing experience than typing on a keyboard. The haptic motor in Surface Slim Pen 2 brings the feeling of writing on paper to your PC's screen, making it ideal for students or professionals who want to capture handwritten notes digitally. Or teams can brainstorm and sketch with others over Microsoft Teams or Microsoft Whiteboard.

*Battery life varies significantly based on usage, network and feature configuration, signal strength, settings and other factors. See aka.ms/SurfaceBatteryPerformance for details.

Better than pen and paper—sketching, writing, and capturing ideas wherever work is done.
